

What a Plant Knows: a field guide to the senses

By Chamovitz Daniel

Scribe Publications, 2012. Paperback. Book Condition: New. 1. 12.9 x 19.8 cm. A captivating journey into the inner lives of plants ? from the colours they see to the schedules they keep. How does a Venus flytrap know when to snap shut? Can a fern get jet lag? Do roses remember the romance springtime? In What a Plant Knows, renowned biologist Daniel Chamovitz presents a beguiling exploration of how plants experience our shared Earth ? in terms of sight, smell, touch, hearing, memory, and even awareness. Combining cutting-edge research with lively storytelling, he explains the intimate details of plant behaviour, from how a willow tree knows when its neighbours have been commandeered by an army of ravenous beetles, and why an avocado ripens when you give it the company of a banana in a bag (it's the pheromones). And he settles the debate over whether the beloved basil on your kitchen windowsill cares whether you play Led Zeppelin or Bach. Whether you are a green thumb, a science buff, a vegetarian, or simply a nature lover, this rare, inside look at the life of plants will surprise and delight you. 'What a Plant Knows is lively, eloquent, scientifically accurate, and easy-to-read
