

Station Bulletin Volume 97-109 (Paperback)

Filesize: 1.26 MB

Reviews

The publication is simple in go through preferable to fully grasp. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Mrs. Josiane Collins)

Corn is frequently affected with smut. It is not generally considered injurious to stock unless associated with other fungus or bacterial bodies. Experiments have been conducted in which large amounts of corn smut were fed to steers without apparent ill effect. Feeders, however, do not generally consider it a valuable adjunct to a ration. A sample of corn smut was submitted to chemical analysis and a comparatively high percentage of protein secured, for like all fungus bodies it is rich in proteid and nitrogenous matter, much richer than the corn itself. Composition of Corn Smut Water 6.87 Ash 8.90 Crude Protein 14.13 Fat 3.20 Carbohydrates 66.90 Corn Stover. When the grain is removed from corn the stalks and...
