

## Mathematical questions and solutions in continuation of the mathematical columns of the Educational times Volume 49

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 Excerpt: . . . the same nine-point circle; also find (3) the equation of the circum-circle of ABC and the angle at which the two circum-circles cut each other. 9217. (Major-General P. Oconnell.)--In using either the French or English Arithmometer, any two numbers each containing less than nine figures can be multiplied together, and the sum of a series each term of which is the product of two such numbers, whether positive or negative, can be obtained without writing down any figures. It is required to find a formula for the product true to, say, thirteen figures on two numbers each of sixteen figures, so that the result may be obtained by the use of the Arithmometer alone, i. e. , without intermediate record. Solution by Profs. Aiyar, B. A. ; Sircom, M. A. ; and others. If  $a, 3$  be two roots of the second equation, the other...
